Data Sheet

Intelligent Video Analytics Server

The AI175R is optimized for Analytic/Machine Learning Video Surveillance applications. The AI175R comes fully integrated and tested with industry leading video analytic software, offering a turnkey platform for Artificial Intelligence, Machine learning and Heuristic Analytic applications.

Applications

- Medium sized video surveillance locations

Features:

- **1x Nvidia Tesla P4 GPU**
- **2x Intel Xeon Scalable CPU**
- **Up to 768GB DDR4 RDIMM RAM**

The Graphic Processing Unit (GPU) is optimized for the video analytics market. It delivers the performance required for the most demanding megapixel installations.

Multiple CPU configurations available to create the most efficient and cost-effective analytics solutions.

Powerful server and storage system, built around dual high-performance Intel® Xeon® Scalable processors.

Purpose-built open platform to integrate Video Management Software, and Video Analytic Software Providers. All major supported Video Analytic Software providers are prequalified. More are continually added to ensure the widest possible certification coverage.

Effortless installation, management and administration along with advance RAID
